What is Ashish Interbuild Pvt. Ltd.

Today, Ashish Interbuild Pvt. Ltd. Is regarded as a trusted and sought after name in interiors' execution in the country with projects being executed simultaneously in multiple cities. They have their presence in all the leading cities of the country and are specialists in executing interiors of restaurants, hotels & offices.

History

A decade ago, Mr. Ashish Thakkar, the founder & managing director, came across an opportunity to designing the interiors of the Pizza Hut in South Mumbai. He grabbed that opportunity and since then, they have been involved in turnkey executions of prestigious projects with MTV India, Godrej Properties, Dodsal Corporation, Shiro, LAP and many more.

They also have worked with the best of architects in the country - Sandeep Khosla, Alfaz B. Miller and Sanjay Puri, to name a few.

Their Strengths

Their ability to deliver desired quality on time, anywhere across the country enabled them to stand out among their competitors. They can proudly say that there is not a single customer, consultant or partner they have lost since their inception.

Their Team

They have a strong team of 55 young professionals - 15 managing the back office operations and 40 managing the sites. With the support generated, they are able to ensure quality control and timely completion of all their work.

Focus on Efficiency

They have a reputation for efficiency and to further add to it, they have implemented eresource ERP software to thoroughly

Project Planning,
Management and
Control

Financial Management

Sales and Customer
Management

consolidate all their operations and make information flow seamlessly from the project sites, wherever they may be, across the country, to their offices, which provide them immediate support and guidance, besides adding transparency

Why eresource ERP?

eresource ERP for Construction is a comprehensive ERP solution designed by taking utmost care with core functionality of the industry in mind.

While developing the eresource ERP for Construction Industry, core functional areas such as Project Monitoring and Control, Sales Management, Tendering, Bill of Quantities, Purchase and Supplier Management, Onsite Engineers Portal, Material Management, Labour and Contractors Management, Accounts Management and Human Resource Management have been given extra care and prominence.

All activities right from pre-construction stage to post construction stage can be captured and monitored. Management can access and manage onsite activities from anywhere anytime. Independent Estimates can be generated for each task based on respective quantities. Estimating is facilitated by system prompted activities. All different activities can be defined as different assemblies. Associated with each assemblies are bill of quantities, labours, turnaround time for completion.

Scheduling interface similar to MS Project Interface has been provided with grant chart view. Estimated schedule and actual activity of all tasks are made available at one screen with Grant Chart View. Resource Management takes in to account of all resources utilization, keeping track of materials, while resource sheet lists activity with estimated quantity and rate for each item. Resource and cash flow management depict planned versus actual utilization with drill-down variance analysis and warning alerts.

Key Benefits:

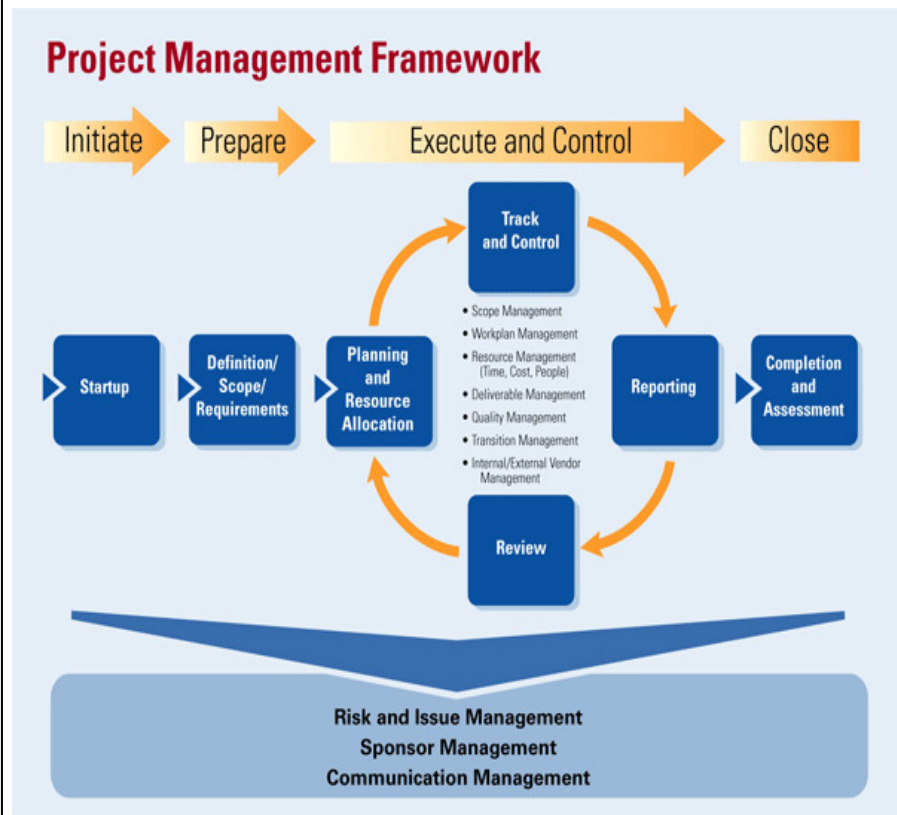

- > Gained enterprise-wide view of operations and centralized management control
- > Improved information accuracy by introducing single data entry point
- > Cut month-end reporting time from 20 days to 12 days
- > Increased availability of manufacturing s for productive use
- > Minimized equipment downtime by ensuring parts can be easily located
- > Strengthened cost management and quality control
- > Streamlined distribution and ensured customer orders are met

Benefits at a glance:

- Comprehensive cost estimation while maintaining a detailed and reliable cost history centrally.
- Estimation through the use of central libraries, historic cost records and time and materials worksheets.
- Review of the engineer’s estimate of probable cost; produce a proposal bid item list for inclusion in the bid documents.
- Issue prime contracts, subcontracts, purchase orders, potential change orders, and change orders, then release these items to accounting for review, approval, and use.
- Access subcontract and PO status, initial and revised totals, pending and approved changes, and amounts invoiced, retained and paid.
- Access pre-designed reports and inquiries or design your own.
- Readily configured Master tables and items for infrastructure projects (such as fixed asset types for construction equipment).
- Creation of projects based on receipt of tenders and creation of tender responses.
- Creation of budgets based on detailed BOQ-based project estimation.

eresource ERP for Construction Industry solution focus on planning and execution of construction projects large or small, distributed or single-site. Our solutions allow you to manage information flows through every phase of a program or project-from planning and estimation, through procurement, project execution, and into operations and maintenance-all supported by powerful dashboards and reporting

Implementation Process

Advice from Ashish Interbuild Pvt. Ltd.

- ✚ Avoid customization if possible. An integrated ERP system has in-built logic, and once you undertake customization, you run the risk of disturbing that symmetry
- ✚ Keep objectives simple and don't complicate things by being overly ambitious. This will make it easier to fulfill objectives, promote organizational change, and achieve ROI
- ✚ Choose a partner with sound integration capabilities and good understanding of business processes
